

PARTNERSHIP PLAN

2024-2025

École de Technologie Supérieure
1100, Notre-Dame Ouest, Montréal,
QC H3C 1K3, Canada

OUR STUDENT TEAM

ComÉTS is a student club that was founded in 2022 at École de Technologie Supérieure, in Montréal. With 30 members studying in various engineering fields, we design and fabricate electric racing motorcycle prototypes for MotoStudent, a world renowned engineering competition which takes place biennially at Motorland, Aragon.

Our goal for our future is very simple: to win a place on the podium of the 8th edition of MotoStudent.

STORYLINE 2022

ComÉTS is founded with the goal of creating our very first electric motorcycle prototype

2023

ComÉTS officially becomes a MotoStudent Electric team.

With only 5 months to design and build a prototype for the 7th edition, our team achieves what had seemed impossible.
